(21 cm) h X 4.8"  
(12 cm) d

**M5076A**

**SLIM CARRY CASE**

Dimensions:  
9.5" (24 cm) w X 8.5"  
(21 cm) h X 3.5"  
(9 cm) d

### CARRY CASES

There are two carry cases available for the HeartStart Defibrillator: the Deluxe Carry Case and the Slim Carry Case.

Both cases are constructed with semi-rigid materials and covered in durable red cordura. In addition to the defibrillator, the Deluxe Carry Case (M5075A) is equipped with a pair of paramedic scissors and can accommodate one spare pads cartridge and a spare battery pack. The Slim Carry Case (M5076A) holds the HeartStart Home Defibrillator and a pair of paramedic scissors.

A window pocket inside both cases holds the OnSite Quick Reference (M5066-97800), which is a brief instruction guide for the defibrillator operator. Its short captions and straightforward drawings break down each step of the defibrillation process.

**A SLIM CARRY CASE IS SUPPLIED WITH OUR HeartStart DEFIBRILLATOR PACKAGE**

### FOUR-YEAR BATTERY

The HeartStart Defibrillator comes equipped with a disposable, lithium manganese dioxide, long-life battery (M5070A) that will typically last for four years with the defibrillator in the standby mode. A spare battery should be stored with the defibrillator. Additional batteries should be purchased for defibrillators used frequently for training or demonstrations.

**A FOUR YEAR BATTERY IS SUPPLIED WITH OUR HeartStart DEFIBRILLATOR PACKAGE**

**68-PCHAT**

**FAST RESPONSE KIT**

Dimensions: 9.5" (24 cm) w X 5.5" (14 cm) h

### FAST RESPONSE KIT

The Fast Response Kit (68-PCHAT) contains tools and supplies typically needed for patient care and personal protection: 2 pairs of hypoallergenic nitrile gloves, a Laerdal pocket breathing mask, paramedic scissors, a Gallant chest hair razor, and a large extra-absorbent paper towel. These items are housed in a zippered pouch which attaches securely to the handle of either carry case.

### PELICAN CASE :IP 67 Protection

Unbreakable, watertight, airtight, dustproof, chemical resistant and corrosion proof. These are some of the features of this Pelican™ Protector Case™ that offers total; protection for your equipment. It is made of Ultra High Impact structural copolymer that makes it extremely strong and durable. Its exclusive 1/4" (6.4 mm) neoprene o-ring and ABS latches seal perfectly and includes an automatic purge valve for quick equalization after changes in atmospheric pressure. Your equipment can fit into the high density foam of the case for total subjection and protection against impact, vibration or shock.

This case is NATO-codified and tested to MIL C-4150J (Military Standard), IP-67 (Ingress Protection) and ATA (Air Transportation Association).

### Wall Mount Bracket

The Wall Mount Bracket (M3857A) is designed specifically for holding a Philips defibrillator and its accessories. The defibrillator's carrying case can be tethered to the Wall Mount Bracket with a breakaway Secure-Pull Seal (M3859A supplied with bracket), to discourage tampering. A broken seal indicates that the defibrillator has been used or removed from the Wall Mount and accessories may need to be replenished. Not suitable for use outdoors

### Basic Defibrillator Cabinet

Steel wall mounting cabinet (S-CAB) with glass window for storage of defibrillator. Includes a basic audible siren alarm (no visual alarm or connectivity to building's security system). Not suitable for use outdoors

## SMART PADS CARTRIDGES

The pads are "SMART" because they work with the device to sense whether they have been removed from the cartridge and placed on the patient's skin. Pictures on the pads illustrate correct placement.

**M5072A**  
**INFANT/CHILD SMART PADS CARTRIDGE**

### Infant/Child SMART Pads Cartridge

Children weighing less than 55 pounds (25 kg), including infants, should be treated using HeartStart Infant/Child SMART Pads (M5072A). These pads instruct the defibrillator to reduce the energy of its shock from 150 to 50 Joules (J), an appropriate dosage. The Infant/Child Pads cartridge is marked with an indication of the appropriate weight and with a teddy bear icon for easy identification.

**M5071A**  
**ADULT SMART PADS CARTRIDGE**

### Adult SMART Pads Cartridge

HeartStart Adult SMART Pads (M5071A) are appropriate for cardiac arrest victims weighing 55 pounds (25 kg) or more

**ONE ADULT SMART PADS CARTRIDGE IS SUPPLIED WITH our HeartStart DEFIBRILLATOR PACKAGE**

## TRAINING TOOLS

### Training Cartridges

To facilitate training on the HeartStart Defibrillator, Adult (M5073A) and Infant/Child (M5074A) Training Pads Cartridges are available.

These special purpose pads, when installed in the HeartStart, suspend the defibrillator's ability to deliver a shock and activate its training mode, enabling the user to run any of eight emergency scenarios. Depending on which cartridge is used – Adult or Infant/Child – the defibrillator's voice instructions, including cardiopulmonary resuscitation (CPR) coaching, will be appropriate for treating the simulated victim.

Each training pads cartridge consists of a removable clear protective lid with a handle, a resealable film cover, and a pair of reusable adhesive pads. It is packaged with a Pads Placement Guide (either Adult or Infant/Child) and illustrated instructions for installing the cartridge, using the Pads Placement Guide, and repackaging the cartridge after using it. A training pads cartridge can also be used on a manikin, connected with an external manikin adapter (M5089A), if necessary. Replacement pads and film covers are available for training cartridges: Adult, M5093A and Infant/Child, M5094A.
